## Cloud Services – Help Build Scalability

Cloud services help organisations build greater scalability and secure handling of external facing applications.

At TEKenable we design and deliver solutions in Financial Services, Healthcare, Agri-Food and the Public Sector using Public, Private and Hybrid Cloud.

We can deliver all aspects of cloud solutions from Virtual Servers to Serverless and Micro-Services architectures. We integrate with

platform services like Service Bus and Cortana Intelligence, Flow, Application Insights and Security Centre.

In doing so we help organisations achieve greater operational agility, better IT governance and tighter integration of components across the enterprise—from applications and platforms through to cloud infrastructure.

To find out more about how we can help support your digital evolution, call us today on **+353 (0) 1 681 4098**, or visit us at [www.tekenable.ie](http://www.tekenable.ie)

### CLOUD MIGRATION STRATEGY

While many companies plan a cloud-first strategy, in reality most have transitioned only a minority of their applications to the cloud.

At TEKenable we help companies overcome barriers to cloud adoption. Working collaboratively we create and implement a cloud strategy tailored to your organisation that delivers agility, flexibility and real competitive edge.

Our migration centre provides hybrid cloud solutions to help with cost-effective, flexible migration paths. Using a proven methodology, we leverage Microsoft technologies and its ecosystem of partner tools, to migrate apps, data, and infrastructure, securely and cost effectively.

### CLOUD MANAGEMENT AND OPTIMISATION

Cloud computing has the potential to generate significant operational and financial benefits for companies using it. But it does introduce a whole new layer of operational complexity that can undermine the business case which justified moving to the cloud in the first place.

At TEKenable we have expertise in managing and optimising cloud solutions across our blue chip client base by putting in place structures and processes that optimally manage cloud strategies.

### CLOUD TECHNOLOGIES

Our choice of cloud technology partner is Microsoft Azure. Azure provides an ever-expanding set of cloud services to help organisations meet continuous business challenges. This technology platform helps us do more with less, providing rich, cloud-native services that deliver business benefit.

By taking advantage of the broadest set of hybrid capabilities we can deliver true hybrid consistency in applications, data, security and management across on-premises and cloud environments. This gives organisations the freedom to build, manage and deploy applications at speed and at scale.

# TEKENABLE

*built for change*

TEKenable are experts in digital evolution. We're an Irish technology company delivering digital evolution by combining modern technologies with legacy systems, to help companies build real business advantage.

As market demands continuously change, we blend innovative thinking and breakthrough technologies to produce game changing results through improved cost savings, operational efficiencies and enhanced customer experience.

We have global reach with operations in Ireland, UK and UAE, and expertise across Financial Services, Healthcare, Agri-Food and the Public Sector. In 2019, we were named Technology Business of the Year.
