Turning Every Business in to a Digital Business

Almost every company faces a common digital challenge: Harness the power of digital technologies to become more effective, innovative and disruptive or eventually become extinct!

At TEKenable we endeavour to turn every business in to a digital business. Blending the latest technology innovations with legacy systems, we help organisations accelerate their digital capabilities in order to realise real business advantage.

To find out more about how we can help support your digital evolution, call us today on **+353 (0) 1 681 4098**, or visit us at **www.tekenable.ie**

TECHNOLOGY CONSULTING

Our technology consulting practice has been operational for more than 30 years. Our team help companies improve their business by transforming functions across finance, production, customer service, supply chain and operations leveraging a broad spectrum of technologies including Microsoft Dynamics, SharePoint, O365, .NET, SQL Server, Azure and Java to name but a few.

Our unique delivery model is backed by a strong implementation methodology, deep consulting skills and business understanding. We combine this with our sustained focus on delivering integrated, and scalable solutions that drive a real business advantage.

MODERNISING LEGACY SYSTEMS

We approach the blending of legacy systems using 4 fundamental concepts - Wrap Around, Direct Integration, Augmentation and Bridging. Leveraging next generation IT, we build highly scalable, secure services while allowing the legacy systems to remain unaware of their presence.

This transformation helps companies reduce business complexity and costs, improve process flexibility, increase data consistency and enable collaboration across different platforms.

NEXT GENERATION IT

In this era of a massive evolution in technology, companies are looking to expand their business by making use of the newest technology solutions available to them. This has led to increasing demand for next-generation solutions for businesses.

Some of these technologies include Artificial Intelligence and Machine Learning, Cloud Computing, BOT development, Internet of Things, Blockchain, Augmented Reality, Robotic Process Automation, Serverless Computing, Microservices, Business Intelligence and wearables.

TEKENABLE

built for change

TEKenable are experts in digital evolution. We're an Irish technology company delivering digital evolution by combining modern technologies with legacy systems, to help companies build real business advantage.

As market demands continuously change, we blend innovative thinking and breakthrough technologies to produce game changing results through improved cost savings, operational efficiencies and enhanced customer experience.

We have global reach with operations in Ireland, UK and UAE, and expertise across Financial Services, Healthcare, Agri-Food and the Public Sector. In 2019, we were named Technology Business of the Year.
